RttT – OTES Development

The April OTES work session was devoted to reviewing comments submitted by Madison teaching staff members regarding the wording to be used in the OTES evaluation instrument. Language modifications were made by the committee and further clarification is being sought from ODE on several line items by Dr. Silverberg, Ashland University Telego Center facilitator.

At the May 7 meeting, the draft will again be reviewed with a final draft to be available in early June. The June meeting will also be the planning meeting for development of the student performance measures for the OTES.

The RttT transformation team plans to take a completed draft that encompasses both the teacher performance and student performance portions of the plan to the Association and Board by May or June of 2013. The plan is to be approved by July 1, 2013 for initial use in the 2013-14 school year.

Several Transformation team members will be attending a statewide meeting in Columbus on Friday, May 25 to review ODE/legislative changes and requirements for OTES.

Planning for Year 3 of Grant (2012-2013)

Madison will be represented by Transformation Team members at a Regional meeting on May 16. This meeting will allow local team members to meet with ODE/RttT support personnel to develop the 2012-13 program. A slight increase (approximately \$ 3,000) in funding will increase the remaining two year's total allocation to \$ 201,701 plus any carry over funds from this year's program. Professional development, materials to provide instructional support for teachers, and development of Madison's OTES model are part of the final two year program goals. Program, budget, and professional development plans and revisions are due in early June.
